

CSS flex-grow Property

[Reference](#)

Example

Let the second flex-item grow three times wider than the rest:

```
div:nth-of-type(1) {flex-grow: 1;}  
div:nth-of-type(2) {flex-grow: 3;}  
div:nth-of-type(3) {flex-grow: 1;}
```

[Try it Yourself »](#)

Definition and Usage

The **flex-grow** property specifies how much the item will grow relative to the rest of the flexible items inside the same container.

Note: If the element is not a flexible item, the **flex-grow** property has no effect.

Browser Support

The numbers in the table specify the first browser version that fully supports the property.

Numbers followed by `-webkit-` or `-moz-` specify the first version that worked with a prefix.

| Property |  |  |  |  |  |
|-----------|---|---|---|---|---|
| flex-grow | 29.0 21.0 -webkit- | 11.0 | 28.0 18.0 -moz- | 9.0 6.1 -webkit- | 17.0 |

CSS Syntax

```
flex-grow: number|initial|inherit;
```

Property Values

| Value | Description | Play it |
|---------------|--|---------------------------|
| <i>number</i> | A number specifying how much the item will grow relative to the rest of the flexible items. Default value is 0 | Demo > |
| initial | Sets this property to its default value. Read about <i>initial</i> | |
| inherit | Inherits this property from its parent element. Read about <i>inherit</i> | |
