

Languages

Countries

# ISO

The ISO class provides a list of ISO codes.

Namespace: \

File location: lib/base.php

---

## Languages

The `languages()` method provides a list of languages indexed by ISO 639-1 language code:

```
$languages=\ISO::instance()->languages();  
// direct search:  
echo $languages['pl']; // Polish  
echo $languages['km']; // Khmer  
echo $languages['br']; // Breton  
// reverse search:  
echo array_search('Greek',$languages); // el
```

## Countries

The `countries()` method provides a list of countries indexed by ISO 3166-1 country code:

```
$countries=\ISO::instance()->countries();  
// direct search:  
echo $countries['ch']; // Switzerland  
echo $countries['sg']; // Singapore  
echo $countries['vu']; // Vanuatu  
// reverse search:  
echo array_search('Peru',$countries); // pe
```
